ISBN: 978-90-367-8089-6 (printed version)
978-90-367-8090-2 (electronic version)

The research described in this thesis was carried out between 2010 and 2015 in the Research School of Behavioural and Cognitive Neurosciences (BCN) in the research group Cellular Biochemistry of the University Medical Center Groningen, University of Groningen, the Netherlands. Cellular Biochemistry was first part of the Department of Neuroscience and hosted by the Enzymology group of the Department of Biochemistry and as of 2012 part of the European Research Institute for the Biology of Aging (ERIBA). The work was financially supported by the Netherlands Organization for Scientific Research (NWO).

Membrane protein targeting to the outskirts of the endoplasmic reticulum

A characterization of sorting signals

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 23 september 2015 om 12.45 uur

door

Annemarie Kralt

geboren op 20 januari 1983
 te Meppel

I see trees of green, red roses too
I see them bloom for me and you
And I think to myself what a wonderful world.

I see skies of blue and clouds of white
The bright blessed day, the dark sacred night
And I think to myself what a wonderful world.

– Louis Armstrong –

*Voor Anne
mijn lieve man, maatje, collega*

Table of contents

Chapter 1.	An introduction on the insertion, quality control and targeting of endoplasmic reticulum-inserted integral membrane proteins	9
Chapter 2.	Searching for putative inner nuclear membrane proteins in yeast with 'NLS-L' sorting motif	21
Chapter 3.	Conservation of inner nuclear membrane targeting sequences in mammalian Pom121 and yeast Heh2 membrane proteins	31
Chapter 4.	Intrinsically disordered linker and plasma membrane-binding motif sort Ist2 and Ssy1 to junctions	61
Chapter 5.	Functional insights into the activation of the SPS sensor	81
Chapter 6.	Discussion	93
